TAN Q NGUYEN
Primary Examiner
Art Unit: 3661

Office Action Summary	Application No.	Applicant(s)
	10/029,917	
	Examiner TAN Q NGUYEN	Art Unit 3661

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on _____.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) _____ is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) _____ is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All
 - b) Some *
 - c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) <input type="checkbox"/> Notice of References Cited (PTO-892)	4) <input type="checkbox"/> Interview Summary (PTO-413)
2) <input type="checkbox"/> Notice of Draftsperson's Patent Drawing Review (PTO-948)	Paper No(s)/Mail Date. _____ .
3) <input type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date _____ .	5) <input type="checkbox"/> Notice of Informal Patent Application (PTO-152)
	6) <input type="checkbox"/> Other: _____ .

DETAIL ACTION

Notice to Applicant(s)

1. This office action is response to the Request for Continued Examination December 08, 2003. As per request, the previous not entered amendment filed on November 03, 2003 has been entered. Claims 1, 10, 20 and 28 have been amended. Claims 1-42 are still pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-6, 8, 10-25 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abe (6,088,652) in view of Berstis (6,182,010) and Nanba et al. (5,739,772).

5. With respect to claims 1-5 and 10, Abe discloses an electronic navigation aid device which includes a processor (see figure 1, item 1), a memory for storing cartographic data and route to a desired destination (see figure 1), a display for displaying cartographic data and an enlarge display of an intersection (a decision point) which the vehicle is approaching (see the abstract and figure 4).

6. Abe does not explicitly disclose that the enlarged display is an overlay screen on top of any presently display screen. However, such feature is well shown in at least figure 5 of the Berstis reference. It would have been obvious to one of ordinary skill in the art to incorporate the teaching of Berstis into the system of Abe in order to superimpose the enlarge display of an intersection when the vehicle is approaching to the intersection while maintaining the display of the planned route, thereby not only allow the driver to see the detail intersection but also see the overview the current status of the position of the vehicle.

7. Abe and Berstis disclose the claimed invention as discussed above except for the portion of the course is highlighted through the decision point and display motion of the device on the course through the decision point. However, Nanba et al. do suggest the calculated route is highlighted to provide more clearly such route through the intersection, i.e. the decision point (see at least figure 14 and the related text). Nanba et al. further disclose the display motion of the device on the course through the decision point (see at least figure 11, mark A is the current position of the vehicle on the course; figures 11, 12 and the related text). It would have been obvious to one of ordinary skill in the art to incorporate the teaching of Ito et al. into the system of Abe in

order to provide more visual the detail of the course approaching the intersection and also follow through pass such intersection.

8. With respect to claim 6, Berstis does disclose that marker at the enlarge image for the driver to know the current status of the vehicle (see at least figure 5, item 96).

9. With respect to claim 8, Abe disclose that the system includes the current vehicle is checked regularly to see when the vehicle is approach to the intersection (see at least figure 4, steps 46-52).

10. With respect to claims 11 and 12, Abe further discloses that the detail intersection is displayed based on the speed of the vehicle (see at least the abstract).

11. With respect to claim 25, Abe does disclose GPS for detecting the position of the vehicle (see at least column 6, lines 51-54).

12. With respect to claims 13-24 and 27, the limitations of these claims have been noted in the rejection above and in the references above. They are therefore considered rejected as set forth above.

13. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Abe, Berstis and Nanba et al. as applied to the claims above, and further in view of Yokoyama (6,263,276).

14. Abe, Berstis and Nanba et al. disclose the claimed invention as discussed above except for the set of travel habits is stored in the memory. However, Yokoyama et al. suggest a communication navigation system which includes a driver route history memory area for storing travel habits (see at least the abstract and figure 1). It would have been obvious to one of ordinary skill in the art to combine the teaching of Yokoyama, Abe, Berstis and Nanba et al. in order to provide the system with the

enhanced capability of reducing the route calculation time by taking the travel habits into account.

15. Claims 9 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abe, Berstis and Nanba et al. as applied to the claims above, and further in view of Kaneko (5,729,109).

16. Abe, Berstis and Nanba et al. disclose the claimed invention as discussed above except for the use of audio instructions to navigate along the route as well as through a course at the decision point. However, such audio output for guiding the vehicle along the planned route and also toward the intersection as shown in at least the abstract and figures 2-9 of the Kaneko et al. It would have been obvious to one of ordinary skill in the art to incorporate the teaching of Kaneko et al. into the systems of Abe, Berstis and Nanba et al. to not only provide the visual guidance but also the audio guidance to driver to improve the navigation system.

17. Claims 28-33 and 35-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Abe, Berstis and Nanba et al. as applied to the claims above, and further in view of Harada (6,052,645).

18. Abe, Berstis and Nanba et al. disclose the claimed invention as discussed above except for the use of server and the communication between the navigation system onboard the vehicle and the server. However, such limitation is shown in the Harada reference in at least the abstract and figures 1-5. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Abe system by incorporate the communication with the server in order obtain the detail map via the server, thereby reducing the required capacity of the onboard memory of the vehicle.

Art Unit: 3661

19. Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Abe, Berstis, Nanba et al. and Harada as applied to the claims above, and further in view of Yokoyama (6,263,276).

20. Abe, Berstis, Nanba et al. and Harada disclose the claimed invention as discussed above except for the set of travel habits is stored in the memory. However, Yokoyama et al. suggest a communication navigation system which includes a driver route history memory area for storing travel habits (see at least the abstract and figure 1). It would have been obvious to one of ordinary skill in the art to combine the teaching of Yokoyama, Abe, Berstis, Nanba et al. and Harada in order to provide the system with the enhanced capability of reducing the route calculation time by taking the travel habits into account.

Remarks

21. All claims are rejected.

22. Applicant's arguments filed on November 03, 2003 have been fully considered. Applicant argued that the references used do not teach the limitation that just has been added to the claims. Upon the updated search and reconsider the amended claims, the new ground of rejection has been set forth as above.

23. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Nguyen, whose telephone number is (703) 305-9755. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Cuchlinski, can be reached on (703) 308-3873.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

Application/Control Number: 10/029,917
Art Unit: 3661

Page 7

or faxed to:

(703) 872-9306, (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park V, 2451 Crystal Drive, Arlington, VA., Seventh Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-1113.
